WORLD HAPPENINGS BRIEFLY TOLD

The Bank of England recently bought £48,000 in gold.
Frying time of the London Cape Town air mail has been cut from 11 to 10 days for the 4,000-mile trip.

Proclamation has been issued by the Dominion Government extending the Canada-New Zealand trade agreement for six months from May 24.

Fourty-three cases of malaria for the national exhibit of the Kingdom of Siam at the forthcoming World's Great Show has reached England.

The Manitoba Government is richer by \$2,045, which was realized in the sale of hay cutting privileges on crown marsh lands of the Red River delta north of Bedford.

After a year of delay, Mr. P. Fraser, of Calgary, has taken over his new duties in Ottawa as managing secretary of the National Dairy Council of Canada. Mr. Fraser succeeds W. F. Stephens.

Charles Gustave has secured for air mail from Europe when the Graf Zeppelin's mail was delivered at Bremerhaven, Germany, after it had left Friedrichshafen.

After an absence of three years, liquor advertising is to be permitted in the Maritime. The Maritime Government liquor control commission has rescinded the order banning liquor advertising, it was reported.

Unless outside interests decide to act for commercial fishing, the Canadian waters off the Atlantic coast will be closed to foreign fishing vessels by the end of the year.

Any German deserting to the U.S.A. may get a \$1,000 bounty. The U.S.A. is now offering a \$1,000 bounty on a deserter. The U.S.A. is now offering a \$1,000 bounty on a deserter.

A Simple Reanimator
Drunk Can Restore Breath Patient and Deceive Brachia

A simple reanimator which creates response in newly born babies, and restores breathing to adults by the means of a rubber tube, has been developed at the Dr. Parnell Charity Hospital in Adelaide, Australia.

The front end of the double has been built and rubber tubes which the patient's head to protrude. The inner cylinder is an air chamber which is connected to the outer cylinder.

The outer cylinder is an air chamber which is connected to the outer cylinder. The outer cylinder is an air chamber which is connected to the outer cylinder.

Additional advantages were that the device warms and moistens the air and the blood circulation is stimulated by the rocking.

Computing For World's Honors
Women Athletes Will Enter British Empire Games in 1934

The largest gathering of women athletes ever known in the world, in London, England, in 1934, Events for women are to be held at the British Empire games, which take place in August next year, and representatives of every part of the world will attend.

The women's world games are being held in London in the same month, and it is hoped that most of the world's athletes will stay for the international gathering. Mrs. Marjorie Leitch, secretary of the British amateur athletic association, said recently: "We expect that from 30 to 40 nations will send their women's world games. Each will send to the representative and more if they

Millions For Brief
For all Canada during the past year and a half years, the Dominion Government has expended direct and indirect \$153,000,000 to relieve unemployment and to create work.

The figure compiled semi-officially shows advances to provinces that have been made in the form of grants and loans to the provinces. For the current year the Dominion Government limits outlay to \$20,000,000.

Not A Bad Companion
A father and his little boy were having a discussion in legal matters. "What is a rearing?" asked the little boy.

"A rearing," replied the father. "A rearing is a fee paid to a lawyer before he will undertake to do any work for you."

"Oh," replied the little boy, "like getting a suiting in a motor before you get any more."

A woman in Germany is earning a living by talking to lonely passengers. They may stimulate motor-sleepers for trains on secondary lines.

Spy Responsible For Sinking Of "Lautalia"

Events Leading To The Disaster Resulted In A War Night Club
The correspondent of a London newspaper recently spoke to the German spy responsible for the sinking of the Lautalia 18 years ago.

Here is the story told about a battle ship, a night club and a man in whose name cannot be named.

"In April, 1913, I received orders to visit to report to Berlin."

"I was then a clever man, and had learned my way into English ships."

"The money I gave him went to found Turin in Ireland, and to pay for the coastal service of the Maritime. The Maritime Government liquor control commission has rescinded the order banning liquor advertising, it was reported."

"I saw the report of the captain of the ship, and I went to Admiral von Tirpitz. Here."

"Information, reliable, reached me. The ship was a German ship. The ship was a German ship. The ship was a German ship."

"I was then a clever man, and had learned my way into English ships."

"The money I gave him went to found Turin in Ireland, and to pay for the coastal service of the Maritime. The Maritime Government liquor control commission has rescinded the order banning liquor advertising, it was reported."

National Research Council Reports On Relative Value Of Various Feeds For Livestock

The pressure of the comparatively low prices of grain now being produced in Canada has driven many members of the farming community to seek more profitable returns, by feeding their livestock on the farm and marketing in the form of livestock. This trend has caused increased interest in the relative utility and value of the different grains for various classes of farm animals. The information contained in the recently published Report No. 20 of the National Research Council, "The Comparative Feeding Values for Livestock of Barley, Oats, Wheat, Rye and Corn" should therefore be of considerable practical value to farmers and stock raisers at this time.

In a foreword to the Report, Dr. R. H. Evelyn, Director of the Division of Biology and Agriculture of the National Research Council, states that the lack of sufficient scientific information on this question, and the consequent uncertainty as to results of feeding experiments, particularly with regard to barley, a home-grown product, and corn, a largely imported, was brought to the attention of the Association of Agricultural Chemists of Canada by the Ontario Branch of the National Research Council of the wheat pool. Having been referred to Professor C. M. Crumpton of MacDonald College, Ontario, the latter was asked to assist him in reviewing all the modern scientific literature concerning the relative nutritive value of barley, oats, wheat, rye and corn, and to prepare a report thereon. This report, Professor Crumpton has now completed.

The purpose of his survey 150 published accounts of feeding experiments with these grains were reviewed. In Canada, much of the grain is used for stock raising, and the relative nutritive value of the various grains for this purpose is of great importance. The relative nutritive value of the various grains for this purpose is of great importance. The relative nutritive value of the various grains for this purpose is of great importance.

The comparative nutritive value of the various grains for this purpose is of great importance. The relative nutritive value of the various grains for this purpose is of great importance. The relative nutritive value of the various grains for this purpose is of great importance.

A comprehensive summary of the findings of the report is provided in the report, which is a valuable guide to the farmer. The report is a valuable guide to the farmer. The report is a valuable guide to the farmer.

Mysterios Of The Sea

Every body has his story of Vanished Ships.

The "Zetina" was a sailing ship, which was driven many miles from the shore and found in the form of a wreck. It was found drifting, and in the English Channel, a mile or two from the shore.

It was not, obviously, a derelict. All her sails were properly set, and the ship was in good order. It was found in the form of a wreck.

It was not, obviously, a derelict. All her sails were properly set, and the ship was in good order. It was found in the form of a wreck.

It was not, obviously, a derelict. All her sails were properly set, and the ship was in good order. It was found in the form of a wreck.

World Honor Captain Berrier

Parliament Likely To Recognize Services of Veteran Arctic Explorer.

In the Senate, the Hon. J. J. C. Gagnier made the proposal, which was promptly endorsed by the Government leader, the Hon. Arthur Meighen, that Parliament should make suitable recognition of the services performed by Captain J. B. Berrier, the veteran Arctic explorer, who has been in the Arctic region for many years.

It was not, obviously, a derelict. All her sails were properly set, and the ship was in good order. It was found in the form of a wreck.

It was not, obviously, a derelict. All her sails were properly set, and the ship was in good order. It was found in the form of a wreck.

Billions In Gold Lost

Many Ways Through Which World's Supply Has Been Depleted.

Lost from the face of the earth, 13,000,000,000 in gold! The figure appears to be incredible but it is actually the assurance that it is absolutely true, nonetheless.

According to the U.S. Bureau, the total output of gold since the production of the world's mine was first recorded in 1793, has been 1,800,000,000 ounces, which is valued at about \$13,000,000,000.

Now the present gold holdings of the world for currency purposes are roughly \$12,500,000,000, and the world's gold reserves are roughly \$1,000,000,000, and the world's gold reserves are roughly \$1,000,000,000.

Now the present gold holdings of the world for currency purposes are roughly \$12,500,000,000, and the world's gold reserves are roughly \$1,000,000,000, and the world's gold reserves are roughly \$1,000,000,000.

Now the present gold holdings of the world for currency purposes are roughly \$12,500,000,000, and the world's gold reserves are roughly \$1,000,000,000, and the world's gold reserves are roughly \$1,000,000,000.

Joint Commission On Conservation and Afforestation Hold Meeting at Regina

The Joint Commission on Conservation and Afforestation of the prairie provinces of Canada, had its inaugural meeting at Regina, Saskatchewan, last week.

There were present the following members of the Joint Commission: Hon. James P. Ryan, W. D. Cowan, M.D., M.P., Professor C. C. Macdonald, Hon. James P. Ryan, W. D. Cowan, M.D., M.P., Professor C. C. Macdonald, Hon. James P. Ryan, W. D. Cowan, M.D., M.P., Professor C. C. Macdonald.

It was agreed that as work was carried on and results obtained, all members of the Joint Commission should be kept in the picture.
